OPUS®
Testimonials

Those who have tried it speak about it best

The device will completely change the way I treat my patients. The unit will streamline appointments and make it easier to switch between supra and subgingival air polishing. With everything available on one unit it will enhance the patients' hygienist experience.

DH Sam Mc Hale (UK)

The device is what I've been waiting for... It's a good working workflow!

Dr. Frederik-Christian Hollay (Germany)

It's versatile, easy to use, easy to maintain, good looking, more efficiente, less invasive, delicate, human-made with personal input.

Dr. Tea Natsvlishvili (Georgia)

OPUS® has raised the bar, keeping the smooth reliable scaler and making a duo unit is a game-changer. OPUS® is not just a machine but a partner in delivering exceptional patient care.

DH Charlotte Benson (UK)

It's a very well designed machine that helps giving patients the best quality treatment with high efficiency and pain free workflow.

DH Kassem Sindian (Belgium)

The air polishing is a nice experience for a patient.

DH Carlotta Becciani (Italy)

OPUS is my best friend and assistant during patient treatments. It is easy to maintain, very user-friendly, and a pleasure to work with. My patients are also very happy with the results, which confirms its effectiveness for me.

DH Sylvi Boer (Netherlands)

From simple prophylaxis to complex treatments, OPUS® adapts to every procedure and patient condition. **Its versatility empowers you to work your way enhancing your skills, elevating standards,** and **meeting patient expectations.**

With OPUS®, you always find a minMAX solution: **minimal invasiveness and constraints, maximum performance and comfort achieved your way.**

For every **indication**, **one** min**MAX solution**

CHOOSE **YOUR WAY**, MAKE YOUR CARE UNIQUE

We empower clinicians with evidence-based tools to create personalized treatments, aligned with EFP S3-level guidelines[1] for stage-based periodontal care.

Our approach blends versatility and scientific rigor to support minimally invasive, effective therapies tailored to each patient.

1. Sanz M, *et al.* Treatment of stage I-III periodontitis-The EFP S3 level clinical practice guideline. *J Clin Periodontol.* 2020;47 Suppl 22(Suppl 22):4-60.

NOW IT'S TIME
Smart Features, Effortless Control

TO OPUS® YOUR WAY
Designed to intuitively make it yours

Original Air polisher & Ultrasonic Scaling

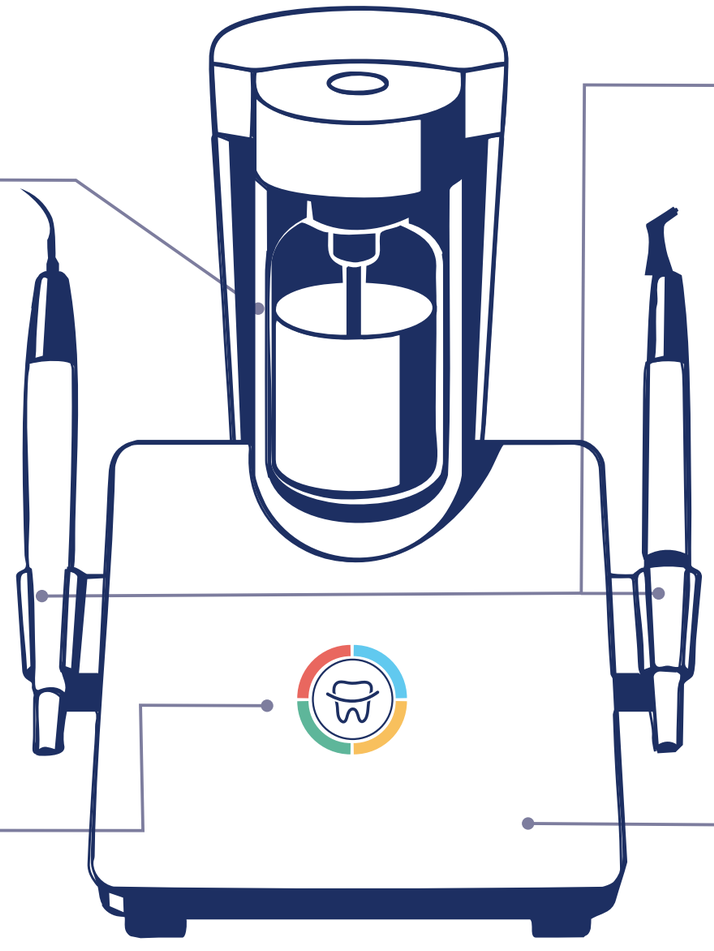

Developed with dental professionals and backed by decades of expertise, OPUS® adapts to you, not the other way around. From its ergonomic interface to intelligent automatic adjustments, every detail simplifies your workflow, making it smoother and truly your own.

Grab & Go Powder System

No handling – effortless bottle insertion and removal, with automatic pressurization triggered by pressing the foot pedal

No refilling – pre-filled bottles eliminate the need for manual powder transfer

No cleaning – sealed system prevents contamination and removes the need for cleaning

Smart Handpiece Recognition

Automatically detects the handpiece and selects the appropriate mode.

Responsive Touchscreen Interface

Works perfectly even with wet gloves.

No hidden menu — every essential function is visible at a glance.

ColorDrive Control:

Intuitive color coding for instant treatment:

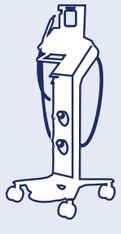

Ultrasonic mode:
Automatic power setting according to the selected indication

Airpolishing mode:
Automatic power and indication settings based on the inserted cleaning powder bottle

Smart Foot Pedal

Four intuitive controls for total freedom and smooth transitions during procedures.

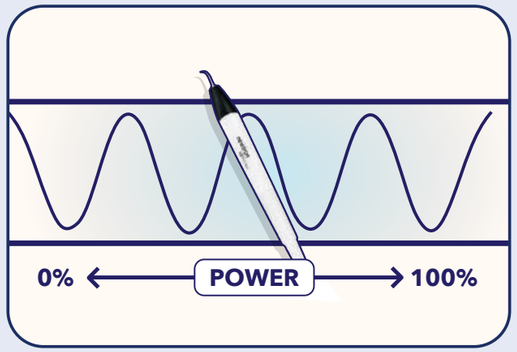

Ergonomic Cart*

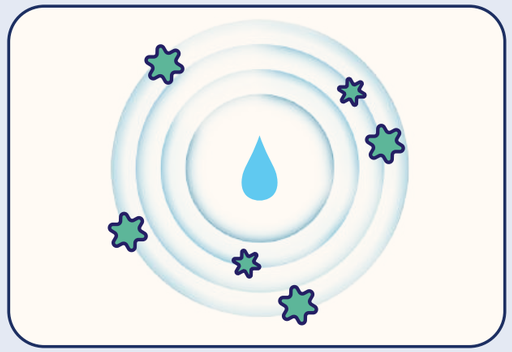

Compact, mobile, and designed to fit seamlessly into any workspace.

*Optional accessory

POWERED BY OPUS®

Exclusive OPUS® Ultrasonic features
engineered to to prevent vibration loss

Strict controlled amplitude of vibration

Using high-frequency technology and linear vibrations, OPUS® technology allows a **constant vibration amplitude** and a precise area of action, **regardless of the chosen power level** or the clinical conditions encountered.

It effectively removes calculus while preserving the integrity of dental tissues. Newtron® technology's controlled amplitude ensures:

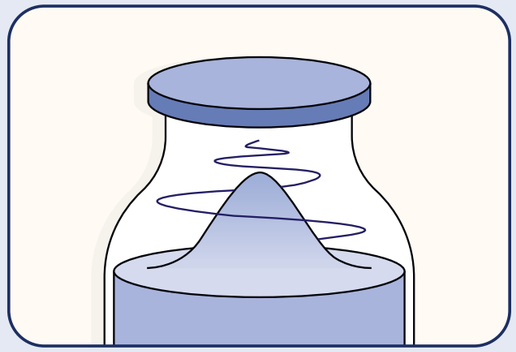

- Efficient intervention
- Minimally invasive treatment
- Reduced risk of microtrauma

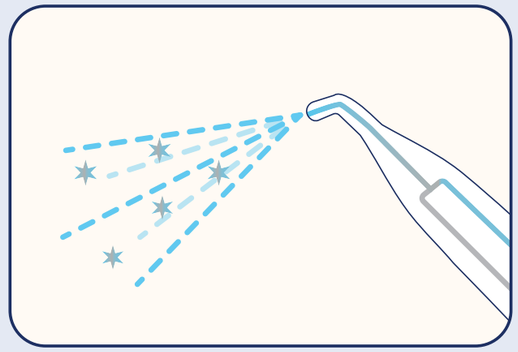

Controlled water flow for optimal cavitation

Precise irrigation control guarantees optimal cavitation at the end of the tip, maximizing biofilm degradation and improving disinfection of the treated area.[1,2,3]

The synergy between ultrasonics and irrigation enhances **antibacterial action**, essential for effective patient care.

Exclusive clogging control system
engineered to minimize clogging from the bottle to the nozzle

Top-Aspiration Powder System

Unlike conventional systems that draw powder from the bottom, causing staging and agglomeration, OPUS® aspirates from the top, **creating a vortex** inside the powder bottle. This vortex ensures consistent powder flow into the pipe, minimizes waste, and prevents clogging.

2 Way delivery system

SILKY® air and powder pipes remain separate from the water channel until the top of the nozzle, **reducing the risk of clogging**.

RealGUIDE®

Exceptional clarity.

At the heart of the X-MIND® optima 3D is **state-of-the-art detector technology**, which guarantees exceptional image clarity and outstanding anatomical coverage. **Its comprehensive range of Fields of View (FOV)**, from 5x5 to 17x12* cm (Ø x H), makes it suitable for a **wide range of dental procedures**, from general dentistry to orthodontics and maxillofacial surgery, while increasing tolerance for patient positioning and reducing the risk of marginal artifacts.

EXTRAORDINARY CLARITY

Get the most out of quality with the brand-new **ClearIQ** filter

OUSTANDING VERSATILITY

From 5x5 to 17x12*, a tailored solution for every clinical need

TOP-LEVEL PERFORMANCE

Enhanced image depth with the new kV output range 60-90

MAXIMUM PATIENT COMFORT

Quick and easy acquisition workflow

AUTOMATIC POSITIONERS RECOGNITION

Maximum accuracy

ZERO FOOTPRINT

Maximum accessibility

* Option - The additional cost for the 17x12 version is €3,000

5x5 cm FOV

- Improves the **detection of root canals**, particularly in case of abnormal root canal **shapes**

8.5x5 cm FOV

- Useful for **implant surgery** and in **general dentistry** as a low dose exam as **limited to a single jaw**

8.5x9 cm FOV

- Useful for **complex implant surgery** as well as left or right TMJ diagnosis

12x10 cm FOV

- Suitable for most **oral surgery cases** including multiple implant surgery

17x12 cm FOV

New

- Represents the perfect solution for **complex orthognathic cases zygomatic implant planning and orthodontic surgery**

Meet the 2D Prime Family

X-MIND® prime is available in three configurations: 2D wall mounted, 2D Ceph and 2D floor to suit all installation and clinical demands.

~~€27.786,47~~
€13.999

X-MIND® prime WALL 110-240V

Order code: W1200001

The ACTEON®s smallest extraoral 2D imaging solution ever for the maximum **accessibility in any context.***

~~€46.677,78~~
with one sensor: **€24.999**

~~€55.279,20~~
with two sensors: **€29.999**

X-MIND® prime CEPH 110-240V

Order code: W1200009

Cephalometric add-on for a full 2D system still encompassing the same philosophy of prime, **ideal for pedriatric applications.**

PSPIX²

is AUTONOMOUS

The fully automated process free yourself from constraints

Just drop the plate inside the slit, the PSPIX®² will automatically detect the size, scan the plate, optimize the image, and send it instantly to your imaging software.
In the meantime, it will automatically erase and eject the plate for an immediate reuse or switch to standby mode.

Scan simply & quickly

Fully automated process

DICOM® Compatible · TWAIN · Mac · Microsoft

~~€8.525,20~~

€6.299

Ref. S_702_0013

1. **Auto-access:** The door only opens when the imaging plate is inserted.
2. **Auto-detect:** PSPIX®² automatically detects the size of the inserted imaging plate.
3. **Auto-scan:** PSPIX®² scans and optimizes the image before displaying it into the right workstation.
4. **Auto-eject:** The imaging plate is automatically erased and ejected for an immediate reuse.
5. **Eco-mode:** PSPIX®² automatically switches to economic mode when not in use for an extended period of time.
